

A groundbreaking AI voice enablement Software Development Kit

The engine of Fluent.ai is FluentAI Core, a light but robust AI software layer that supports customizable commands and predefined language libraries.

This enterprise-grade voice interface uses sophisticated neural network and machine learning technologies to go directly from speech to intent, resulting in faster, more flexible and more accurate

voice recognition compared to conventional technologies.

Why voice enable with FluentAI Core?

- Platform agnostic: works on any platform
- Language agnostic: any language, any accent
- Higher speed, lower cost: voice enablement

at a fraction of the time and cost

- Personalization: custom wake words and commands
- Noise and distance robustness: near-perfect accuracy in any environment
- Offline voice recognition: privacy and security, voice enablement for regions without internet access

Fluent.ai Inc.'s mission is that everyone should be understood by their technology. Fluent.ai offers a range of artificial intelligence (AI) voice interface software products to OEMs and service providers that delivers unprecedented accuracy along with a highly customizable user experience with the goal of finally breaking the barriers to high adoption of voice user interface.
