

Online or offline, be understood.

The Fluent AI Hybrid combines the robust, highly accurate and multilingual voice interface of the Fluent AI Engine with the convenience of internet search.

With the flexibility to connect to any third-party internet search provider, Fluent AI Hybrid allows users to be understood, online or offline.

- Offers both on-device and cloud services for IoT and edge devices

- Continually learns from all users, providing OEMs valuable anonymous feedback on usage patterns
- Allows a large number of people to interact with devices in multiple languages
- Enables an online query feature for any device

Applications:

- Internet of things solutions and devices
- Consumer electronics

- Mobile electronics
- Smart home technologies
- Public, multilingual voice interface
- Software interfaces/customer support interface
- Automotive technologies
- Auto infotainment/autonomous vehicles

Fluent.ai Inc.'s mission is that everyone should be understood by their technology. Fluent.ai offers a range of artificial intelligence (AI) voice interface software products to OEMs and service providers that delivers unprecedented accuracy along with a highly customizable user experience with the goal of finally breaking the barriers to high adoption of voice user interface.
